Q

Gina Niederman

08 August 18

Where will the Cultural Arts Corridor be located?

A

Publicly Answered

[Click here to see a map of the Cultural Arts Corridor.](#)

Q

Linda DeBerry

14 August 18

Will there still be parking nearby for the Walton Arts Center and TheatreSquared?

A

Publicly Answered

One key design element of the Cultural Arts Corridor is the West Ave Parking Lot, used by some Walton Arts Center patrons and visitors to other established venues in that area. The City is committed to providing parking to support the Walton Arts Center and other downtown establishments while creating a walkable environment for today and into the future.

QANDA

Q

Ed

18 August 18

How will West Ave become walkable?

A

Publicly Answered

There are many opportunities to improve mobility on West Ave. The architects will be looking at street crossings and sidewalks to improve pedestrian safety & connections. They have also provided examples of walkability in the Amenities Survey, such as Pedestrian Pathways alongside Playscapes or Integrated Seating and Plantings. We and the architects would love to get your feedback on specific options through this survey. You could also click on the Brainstorm tab and write in a suggestion to improve walkability. At this point, we are getting ideas from the public. The architects will base their design on your feedback. Thank you for contacting us!

Q

Mike

22 August 18

Could this local project become eligible for supplemental or matching State / Federal funding due to its watershed protection or other qualifying criteria?

A

Publicly Answered

Yes, this is quite possible. We have begun considering these funding opportunities in case elements of the final design qualify. Thank you!

While we don't have the same contiguous open park space, we could better seize the opportunity to weave natural elements into our urban fabric. From the web: "The design of CityGarden represents the intersection of nature, art, and civic life within the St. Louis landscape. The park itself is designed to represent the St. Louis landscape and the natural processes that shape it. The main inspiration for the park's landscape is the Mississippi River, whose banks are only a few blocks away. The site is designed to evoke images of how rivers have shaped the landscape throughout history. The processes of water that shape the landscape and, as a consequence, urban form, are the inspiration for CityGarden's design." http://www.nbwla.com/projects/park/citygarden</p> </div>

IDEAS

What would you like to see included in the Cultural Arts Corridor?

29 August 18		<h2>Art, gather, and nature</h2> <p>I would love to see both large and small scale art. Sensory experiences. Open areas mixed with some shaded areas for relaxing or play. The Towncenter area in The Woodlands, TX has an open green area. Something like this but on a larger scale and also less commercial. Incorporate as much nature and gardens as possible as well as a way to sit or walk in it (Trails, seating, dining). Having the space/area that could host festivals such as an art or food truck festival would be fantastic. An amphitheater or some way to have outdoor movie screenings. Might help building up the Fayetteville Film festival.</p>
